

# Putting the Z in Xero

If there's one thing our customers tell us they need more of, it's time. Time for important stuff like growing their business – or just having a life. That's why we've teamed up with another great Kiwi company, Xero, to give you more of what you really need.

## Feeding Z Card invoice data into Xero makes data input a breeze

Now you can get a copy of your Z Card invoice data fed directly into Xero. Which means no more manual entering of transactions – because it's all done for you. Just code and approve the transactions in Xero, and you can get on with all the other stuff you need to do.

### It's flexible

Every business is different, so you can choose to have all your Z Card transactions fed through or just a summary. It's up to you.

### Even better – it's free!

Z is New Zealand's only fuel company to offer this feed – and as a Z Card customer it won't cost you a cent.

### Sign up now – it's easy!

It only takes two minutes to sign up – just visit [z.co.nz/xero](https://z.co.nz/xero). If you don't have a Xero account, visit [xero.co.nz](https://xero.co.nz) to find out more.

Putting the Z in Xero is just another way we are helping Z Card customers get on with what matters.
